Abstract: Showcasing best practice in international education and training

The Queensland Government sought to recognise instances of best practices in providing international education and training services in Queensland. In doing so aimed to share outcomes on activities and practices that assist providers to enhance existing services. Through acknowledging individual and institutional achievements, the Queensland Government seeks to empower education and training providers to provide quality experiences for international students who choose to study with Queensland providers.

The Celebrating International Education and Training Industry Showcase sought best practice examples in providing five general and two individual categories. This paper provides an overview of the submissions thereby stimulating similar initiatives which provide professional development opportunities, enhance the student experience, and contribute to the long term sustainability of the industry.
