What Students Had to Say

- I am on it constantly, I have it on my phone, computer, ipod everything...nothing else is like that
- *SmartPhones made communications easier therefore I receive updates on facebook all the time. (This is an example :)*
- Its convenient and can be frequently checked anywhere. Its handy. Most people are connected, which allows you to keep in touch with other colleagues and everyone can voice their opinions. Its convenient in the sense that it can be checked on the computed, laptop, phone, ipods etc. Such a good place for posts, involvement and to find out what is happening in your own faculty at uni !
- *im on it 24/7 baby :)*
