

What's new in Australian international education

Steve Nerlich – Director, International Research and Analysis Unit, Australian Government
Department of Education

This presentation will provide an overview of the latest data and current trends in Australia's increasingly-diverse international education activities. These include welcoming a growing number of incoming international students from across the world, encouraging more Australian students to study overseas and delivering education offshore through both face-to-face teaching and online education. A picture of what emerging trends may be invisible to traditional data collection methods will also be discussed.
